Setting Date and Time

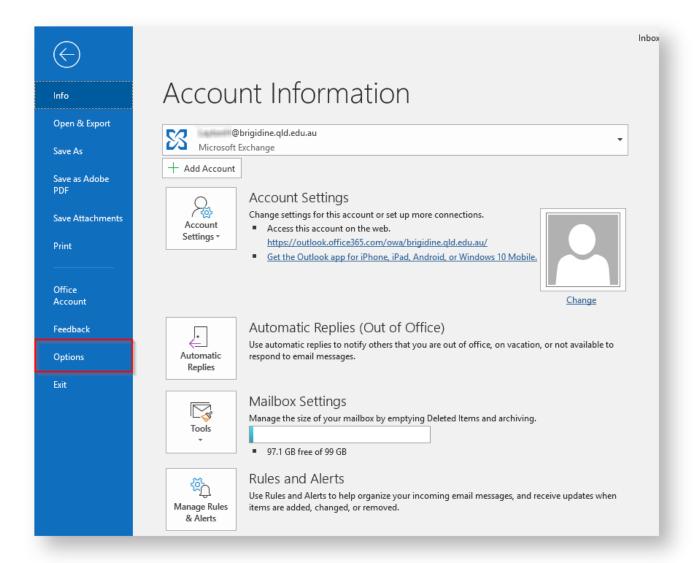

If you are receiving emails in Outlook with incorrect time stamps you will need to change your date and time settings. The steps involved differ depending on whether you access outlook via the Desktop Application or your Internet Browser.

- Date and Time settings in Desktop Application
- Date and Time settings in Browser

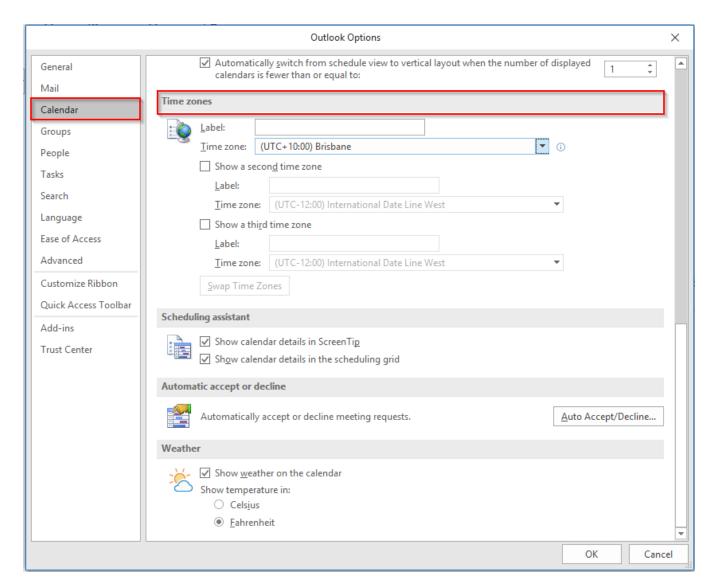

Date and Time settings in Desktop Application

Click File and then select Options

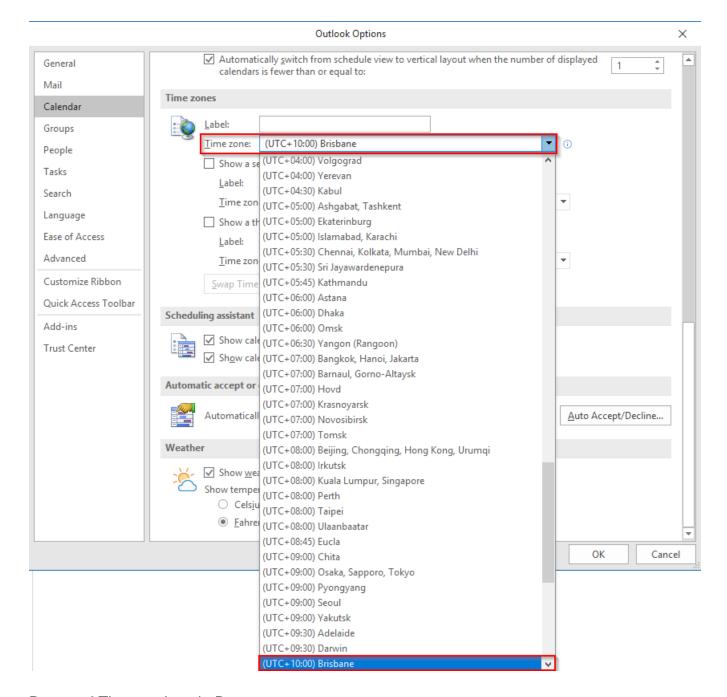

A new window will appear. Select Calendar on the list to the left. Scroll down until you see Time Zones settings

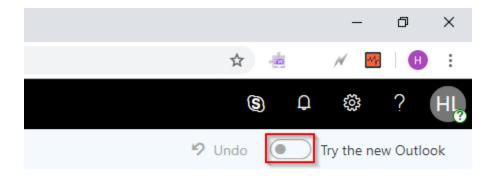

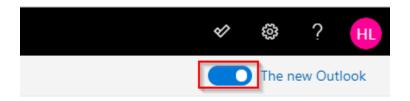

Click on the *Time Zone* drop-down menu and select the option *(UTC+10:00) Brisbane*

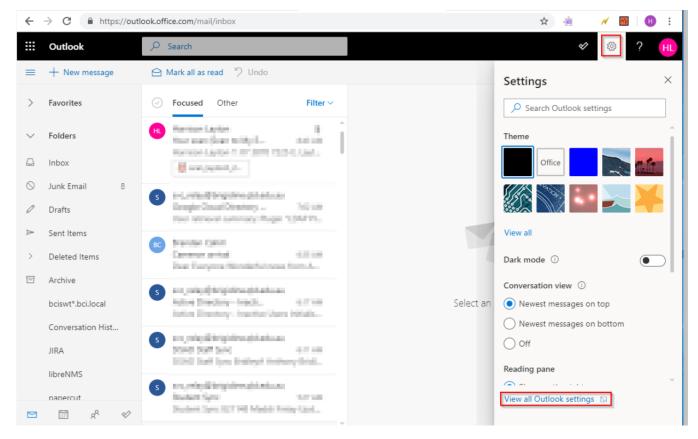

Date and Time settings in Browser

If the *toggle button* on the top right of the browser is grey, click it so that it turns blue.

Click on the *Gear* icon at the top right of the page. Click on the *View all Outlook settings* link.

Click on General then Language and time. Click on the Current time zone drop-down menu.
