

(Superseded) Clearing Google Chrome Cache

If websites are not loading correctly this can sometimes be due to Google Chromes browser cache. Please follow these instructions to clear Google Chrome's cache.

Step-by-step guide

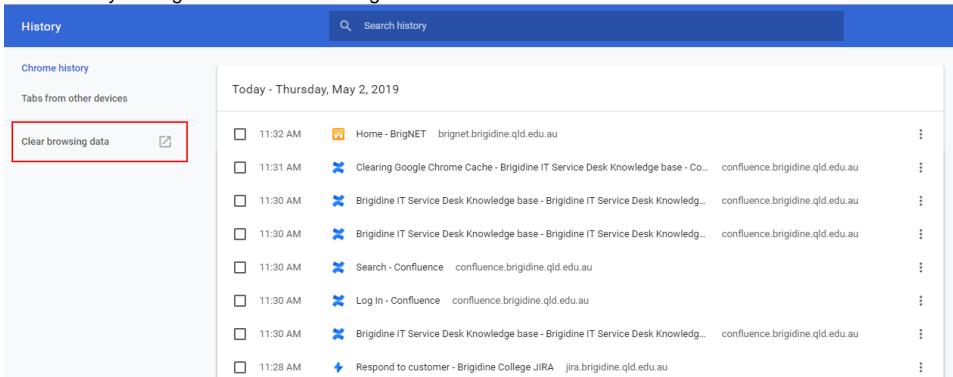

1. Open Chrome and click on the three vertical dots in the top right hand corner.

2. Hover your mouse of History and click History in panel that appear to the left.

3. In the history settings click 'Clear browsing data'

4. In the next window, uncheck 'Browsing history' and 'Cookies and other site data', change the time range to 'All time' and click *Clear Data*

Clear browsing data

Basic**Advanced**

Time range All time ▼

☐ **Browsing history**
Clears history and autocompletions in the address bar.

☐ **Cookies and other site data**
Signs you out of most sites.

☒ **Cached images and files**
Frees up 319 MB. Some sites may load more slowly on your next visit.

CancelClear data

5. Finally, close all tabs and try the troublesome website again. If you find this is still an issue please email IT support at support@brigidine.qld.edu.au
