Procedure if Laptop gets wet

Use these instructions if you spill or suspect that your laptop has been directly exposed to any liquid.

Frequently Asked Questions

Q. I'm not sure if my laptop got wet or not.

A. Turn your laptop off immediately, bring it down to IT asap and let us know that it may have been exposed to liquids.

Q. My laptop got wet in the past and it was fine then, why has it stopped working now?

A. Exposure to any liquid runs the risk of internal corrosion- thus causing errors, while not always instant there are usually longer term effects if not addressed quickly.
